Release Notes

Application:	AFHCANSuite
New Version:	AFHCAN v8.2.1
Release Date:	10/6/2017
Supersedes:	AFHCAN v8.2.0

New Features 8.2.0

AFHCAN mPage

AFHCAN can now be accessed within Cerner. The AFHCANweb client is hosted inside an mPage, allowing users to perform all of their AFHCANweb work without leaving the Cerner application. The first time users open the mPage they will be asked for their AFHCAN credentials to verify access between the two systems. From that point forward, users will be enrolled into Single Sign On and will not need to supply AFHCAN credentials when accessing AFHCAN from Cerner.

CAMM Integration for Case Exports to Cerner

In prior versions, AFHCAN was able to export case summary PDFs into Cerner. This early integration effort used a technology that converted the case summary into a difficult-to-read format. v8.2 now uses Cerner's Care Aware Multimedia (CAMM) technology to show the Case Export in full PDF format, complete with clickable links and full resolution images.

Print Case Enhancement

When Printing a Case from within case options, users will notice a more complete version of the Case Summary is printed in PDF Format.

8.2.1 Patch Fixes

Apostrophes in Usernames

A defect was reported that users with an apostrophe in their names are unable to sign forms. This defect has been fixed, and users with apostrophes in their names can now sign forms.

Slow Forms

A defect was reported by users of 8.2.0, with forms occasionally taking up to a minute to add to a case. This defect has been fixed, and slowness when adding forms has been addressed.

Transparency in the AFHCAN mPage

A defect was reported that when using AFHCANweb inside the Cerner mPage, the overlay window was not transparent and users could not read the case information in a background window. This defect has been fixed, and the transparency functions the same whether in AFHCANweb or the Cerner mPage.

Minimum System Requirements

Server

- If upgrading, Telehealth Consult Server software v6.3 or higher
- Microsoft Windows Server 2008 SP2, 2008 R2, 2012
- Microsoft SQL Server 2008(x86 or x64), 2012, 2014
- Microsoft .NET Framework 4.6.1
- Telehealth Consult Web requires Google Chrome, Safari on iPad, Edge with Windows 10, or Mozilla Firefox

Cart (not part of this release)

- If upgrading, Telehealth Consult Cart software v6.3 or higher
- Microsoft Windows 7 or Microsoft Windows 8 & 8.1
- Microsoft .NET Framework 4.6.1

Mobile (not part of this release)

- iOS 7-10 on iPhone & iPad
- Android Jelly Bean, KitKat, Lollipop, Marshmallow

Compatibility

Server Manager and all Organizations managed by that instance of Server Manager must all be at the same version of Telehealth Consult if your installation utilizes AD integration. This affects the AD Mapper Tool as well as any AD scheduled tasks.
